Key Facts

- World Health Organization
 - Drowning is the 3rd leading cause of unintentional injury death worldwide
- Centers for Disease Control and Prevention (*NCHS Data Brief No. 413, July 2021*)
 - Drowning deaths are the second leading cause of unintentional injury deaths for children aged 0–17 years and the leading cause for those aged 1–4 ([1](#)). Previous studies using national data have shown that unintentional drowning deaths can differ by sex, age, race and ethnicity, and urban–rural category ([2,3](#)). This report uses the latest mortality data from the National Vital Statistics System (NVSS) to present national trends in unintentional drowning death rates from 1999 through 2019 for children aged 0–17.

Project Scope

- Expand pool from 4 to 8 swim lanes with starting blocks
 - Meets UIL competition requirements
- HVAC system
 - New RTU for heating/cooling
